Conference on

Integrated Water Resources Management (IWRM)

13 Jan 2025 (Monday)

Conference Hall CBIP, Malcha Marg, Chanakyapuri, New Delhi

Organized by

Central Board of Irrigation & Power

INTRODUCTION

Water is one of the most critical resources for sustaining life, economic development, and environmental well-being. As populations grow, urbanization accelerates, and climate change intensifies, the management of water resources has become more complex and urgent than ever before. Integrated Water Resources Management (IWRM) offers a holistic approach to address these challenges by promoting the sustainable use, management, and protection of water resources across all sectors agriculture, industry, and urban areas.

To discuss the Issues related to the subject CBIP is organizing one day Conference on “Integrated Water Resources Management (IWRM)” at CBIP Conference Hall, Malcha Marg, Chanakya Puri New Delhi on 13th Jan. 2025

This one-day conference aims to provide participants with a comprehensive understanding of IWRM principles and practices, focusing on the importance of integrating water management with environmental protection, economic development, and social equity.

Through expert presentations, case studies, and discussions, the conference will explore innovative solutions, governance frameworks, and strategies for effective water resource management in a rapidly changing world. By fostering collaboration and sharing knowledge, this conference seeks to equip professionals with the tools needed to tackle today’s pressing water challenges and secure a sustainable water future for generations to come.

TOPICS

This Conference is expected to gather industry experts, researchers, and practitioners to share insights, best practices, and innovative solutions on the subject. The Conference shall cover, but not limited to, the following topics:

- Introduction to Integrated Water Resources Management (IWRM)
- Climate Change and Water Resources
- Water Governance and Policy Frameworks
- Water Quality Management and Pollution Control
- Sustainable Agriculture and Water Use
- Urban Water Management
- Water-Use Efficiency in Industry and the Energy Sector
- Integrated Watershed Management (IWM)
- Financing Water Management Projects
- Case Studies of Successful IWRM Implementation

The takeaways from the above Conference are expected to equip the participants with practical knowledge and tools to implement IWRM principles in their professional work and contribute to the sustainable management of water resources.

CALL FOR PAPERS

The experts, researchers, engineers, and industry professionals are invited to contribute papers/ presentations on the topics and share their knowledge, experiences, and groundbreaking research to enrich the discourse and drive advancements in this field.

WHO SHOULD ATTEND

The Conference would typically expected be attended by a variety of professionals involved with water Management. This may include Water Resource Managers; Engineers and Technicians involved in water infrastructure, irrigation systems, and water quality management; Environmental Consultants focused on sustainable practices, ecosystem health, and pollution control; Academics and Researchers specializing in water resources, climate change, or environmental science. NGOs and Civil Organizations working on water conservation, environmental advocacy, and community-based management; Industry Representatives/ Companies involved in water-intensive industries (e.g., agriculture, energy, and manufacturing) and Water Utilities Professionals managing urban water supply and wastewater systems.
